

The logo for Filtapac features a stylized blue and light blue wave or swoosh shape on the left, followed by the word "Filtapac" in a blue sans-serif font.

# **Filtapac Econoflo Recharge Kit**

Drain water system. Disconnect filter at the end furthest from the blue cap and unscrew cap, Taking care to catch any water remaining. Throw away the carbon bag, sponge & 'O' ring. Replace the white 'cartwheel' spacer first (or green mesh disc on filters prior to April 2004) then stretch the filter bag to about 8" (20cm) 'sausage'. Hold the bag by one end and drop into the filter body. Insert the sponge and check that the 'O' ring is seated in its groove at the end of the screw thread. Screw the filter cap back on & re-connect the pipe. Flush through for 30 seconds (bearing in mind that there will be a flush of dark water for a few seconds) & check for leaks.

**NOT FOR USE WITH CRYSTAL WATER FILTERS**
